- Adam, M. J.; Neumeier, L. A.  
In-Plant Recycling of Specialty Steelmaking  
Particulate Wastes ..... 749
- AFS Segmental Vibration Task Force  
Vibration White Finger (VWF) ..... 227
- Alagarsamy, A.; Jacobs, F. W.; Strong, G. R.; Heine, R. W.  
Carbon Equivalent vs. Austenite Liquidus: What is the  
Correct Relationship for Cast Irons? ..... 871
- Andrews, C. A.; Andrews, R. N.; Andrews, J. B.  
Removal of Excess Manganese from Gray Iron Using  
Polyvinylchloride as a Chlorine Source ..... 505
- Andrews, J. B.; Andrews, R. N.; Andrews, C. A.  
Removal of Excess Manganese from Gray Iron Using  
Polyvinylchloride as a Chlorine Source ..... 505
- Andrews, J. B.; Buchanan, R. A.; Gordon, N. A.  
Evaluation of the Mechanical Properties and  
Corrosion Resistance of New Experimental  
Low-Chromium Stainless Steel Alloys ..... 17
- Andrews, J. B.; Seneviratne, M. V. C.  
A New, Highly Wear-Resistant Aluminum-Silicon  
Casting Alloy for Automotive Engine  
Block Applications ..... 209
- Andrews, R. N.; Andrews, J. B.; Andrews, C. A.  
Removal of Excess Manganese from Gray Iron Using  
Polyvinylchloride as a Chlorine Source ..... 505
- Andrews, R. S. L.; Reier, G. J.  
Planning for Thermal Sand Reclamation ..... 347
- Apelian, D.; Sigworth, G. K.; Whaler, K. R.  
Assessment of Grain Refinement and Modification of  
Al-Si Foundry Alloys by Thermal Analysis ..... 297
- Arterburn, R.; Flesch, L.; Nesbitt, G.  
Recycling Steel Foundry Arc-Furnace Baghouse Dust ..... 475
- Ashton, M. C.; Sharnan, S. G.; Brookes, A. J.  
The Replicast FM (Full Mold) and  
CS (Ceramic Shell) Process ..... 271
- B**
- Bailon, J. P.; Dionne, P.; Dickson, J. I.  
The Influence of the As-Cast Microstructure on the  
Fracture of a Zn-Al Foundry Alloy ..... 693
- Bardenheuer, P. W.; Seese, F. E.  
Metallurgical and Economical Features of  
Long Campaign Hot Blast Cupolas ..... 409
- Bates, C. E.  
Effects of Alloy Elements on the Strength and  
Microstructure of Gray Cast Iron ..... 923
- Bergstrom, L.  
Spray Metal Patterns: An Inexpensive Alternative ..... 309
- Berry, J. T.; Wells, K. J.; Colwell, G. T.  
Two-Dimensional Numerical Simulation of Casting  
Solidification with Heat Pipe Controlled  
Boundary Conditions ..... 429
- Berry, J. T.; Pehlke, R. D.  
Computer-Aided Design for Castings ..... 101
- Berry, J. T.; Saigal, A.  
A Finite Element Method Analysis of the Effect of  
Chilling and Modification on Localized Yielding and  
Crack Initiation in Al-Si Alloys ..... 703
- Berry, J. T.; Desai, P. V.; Kim, C.  
Computer Simulation of Forced and Natural Convection  
During Filling of a Casting ..... 519
- Bethke, L.; Masarik, J.  
Trend Analysis in Green Sand Control:  
Computer Program ..... 119

- Biel, J.; Trojan, P. K.; Ostrom, T. R.; Flinn, R. A.  
Leaded Copper Alloy Reactions with Molding  
Sands and Sand Response to Acid Leaching ..... 793
- Bradley, W. L.; McKinney, K. E.; Gerhardt Jr., P. C.  
An Evaluation of the Toughness of Ductile Iron vs.  
Cast Steel Using Modified Charpy Test Specimens ..... 239
- Brom, L. J. T.  
A Least-Cost Mix System for Melting—  
Furnace Charge Optimization ..... 381
- Brookes, A. J.; Ashton, M. C.; Sharnan, S. G.  
The Replicast FM (Full Mold) and  
CS (Ceramic Shell) Process ..... 271
- Brown, J. W.  
Trends in Ferrous Scrap: Demand, Supply, and Price ..... 785
- Buchanan, R. A.; Andrews, J. B.; Gordon, N. A.  
Evaluation of the Mechanical Properties and  
Corrosion Resistance of New Experimental  
Low-Chromium Stainless Steel Alloys ..... 17
- Burchell, V. H.  
Production Systems for Lost Foam Castings ..... 629
- C**
- Carr, A. L.; O'Neil, W. P.  
Computerized Off Line Programming for Robotic Mold  
Venting at John Deere Component Works ..... 623
- Carter, S. F.; Glover, W. D.; Wright, R. L.  
Effect of Trace Elements and Composition Variables on  
the Annealing Time of Ductile Iron ..... 841
- Charbonnier, J.  
Microprocessor Assisted Thermal Analysis  
Testing of Aluminum Alloy Structures ..... 907
- Chen, I-G.; Stefanescu, D. M.  
Computer-Aided Differential Thermal Analysis of  
Spheroidal and Compacted Graphite Cast Irons ..... 947
- Cherry, W.; Teetor III, R. J.  
Application of Statistical Methods to  
First Sample Approval ..... 259
- Closset, B.; Pekguleryuz, M.; Gruzleski, J. E.  
The Dissolution of Metallic Strontium in Liquid  
Aluminum and Liquid Al-356 Alloys ..... 109
- Closset, B.; Pekguleryuz, M.; Gruzleski, J. E.  
Comparison of Thermal Analysis and Electrical  
Resistivity in Microstructure Evaluation of  
Al-Si Foundry Alloys ..... 123
- Colwell, G. T.; Wells, K. J.; Berry, J. T.  
Two-Dimensional Numerical Simulation of Casting  
Solidification with Heat Pipe Controlled  
Boundary Conditions ..... 429
- Cornell, H. H.; Loper Jr., C. R.; Pan, E. N.; Ogi, K.  
Some Aspects of the Inoculation and Fading of Rare Earth  
Treated Compacted/Vermicular Graphite Cast Iron ..... 401
- Cornell, H. H.; Kanetkar, C. S.; Stefanescu, D. M.  
The Influence of Some Rare Earth (Ce-La-Pr-Nd) and  
Yttrium in the Magnesium Ferrosilicon Alloy on the  
Structure of Spheroidal Graphite Cast Iron ..... 417
- Couture, A.; Sahoo, M.  
Microstructure and Mechanical Properties of  
Continuously Cast Mn-Ni-Al Bronzes ..... 217
- Creese, R. C.  
Unit Cost and Unit Production Standards for the  
Minimum Cost Metal Cutting Model ..... 515
- Curren, P. A.; Hendrix, J. C.; Stefanescu, D. M.  
Directional Solidification of Flake and Spheroidal  
Graphite Cast Iron in Low and Normal  
Gravity Environment ..... 435

Addition effects on cupola iron melts	161
Reverberatory low-energy furnace for holding aluminum	199
Aluminum alloys	
Feeding analysis	671
Microprocessor assists thermal analysis	907
Aluminum bronze; Mn-Ni-Al bronze	
microstructure and properties	217
Aluminum castings; solidification sequence curves in T-shapes	319
Aluminum permanent mold foundry management	499
Aluminum-silicon alloys	
Automotive applications	573
Finite element method analysis of chilling and modification on yielding and crack initiation	703
Thermal analysis use in assessing grain refinement and modification	297
Wear resistant alloy development	209
Aluminums-silicon-magnesium alloys	
Beryllium addition effect in A357	579
Chemistry and solidification rate effects	459
Metallic strontium dissolution	109
Thermal analysis vs. electrical resistivity for microstructure evaluation	123
Arc furnace	
Dusts from stainless steelmaking recycled	749
Dusts recycled	475
Arc furnace power management	545

## B-C

Beryllium; effect in aluminum alloy A357	579
Carbon equivalent relationship to liquidus temperature	871
Carbon raisers, dissolution study	323
Cast iron	
Air carbon arc metal removal effect on microstructure	251
Alloying elements effect on segregation	289
Architecture (1850-1900)	789
Carbon equivalent relationship to liquidus temperature	871
Computer model for solidification of chill test samples	311
Solidification study using electrical resistivity measurements	803
Volumetric shrinkage and mold dilation during solidification	551
Ceramic foam filters for gray and ductile iron	339
Ceramic shell use in Replicast CS process	271
Channel induction furnace refractory build-up	981
Charge cost calculations using a microcomputer	381
Chill test solidification model	311
Chromite sands; post-reclamation properties	177
Chromium plus manganese effect on ductile iron microstructure	387
Chromium substitutions in stainless steel	17
Clay levels of 7-15% vs. green sand properties	467
Cleaning and finishing	
Air carbon arc effect on cast iron microstructure	251
High-pressure abrasive water jet	655
Metal cutting minimum cost models	515
Plasma arc cutting	29
Plasma arc cutting of gray iron using a robot	729
Ventilation guidelines for torch cutting and air carbon arc gouging	529

Compacted graphite cast iron	
Computer-aided differential thermal analysis	947
Effect of structure and Mo alloying on properties	735
In-mold production of ferritic and pearlitic grades	361
Inoculation and fading after RE treatment	401
Morphology and properties	373
Treatment effects using CG alloy with titanium	45
Computer applications	757
Design	101
Finite element method analysis of Al-Si mechanical properties vs. microstructure	703
Least cost furnace charge optimization	381
Melt chemistry and hardenability control	965
Production scheduling	151
Program for green sand system analysis	119
Riser calculations for steel castings	73
Robotic mold venting	623
Scheduling flaskless molding operation	661
Simulation of convective heat transfer during mold filling	519
Simulation of leaded red brass solidification	479
Solidification model for cast iron chill test samples	311
Computer-aided	
Differential thermal analysis of SG and CG cast irons	947
Thermal analysis of Al alloy structures	907
Continuously cast Mn-Ni-Al bronzes	217
Copper alloys	
Corrosion rates in salt water	233
Lead-molding sand reactions, leachate tests, lead reduction	793
Numerical simulation of leaded red brass solidification	479
Coremaking; nineteenth century method for multiple undercuts	789
Corrosion rates of copper alloys in salt water	233
Cost and time models for metal cutting	515
Cost optimization for furnace charges	381
Cost study; hot blast cupola, long campaign	409
Cupola	
Al addition effect on Si recovery, iron temperature, and desulfurization	161
Hot blast, long campaign costs and metallurgy	409

## D

Defects; kish graphite formation in hypereutectic gray iron	281
Design of castings; computer applications study	101
Desulfurization of acid melted steel in the ladle	709
Desulfurization of iron increased by Al additions to cupola	161
Dimensional tolerances; vertically parted, flaskless, high-pressure mold castings	65
Dross formation in ductile iron castings	881
Ductile iron	
Austempered Ni-Mo ductile iron properties	489
Austempering and alloying effects on microstructure and properties	815
Ceramic foam filter development	339
Computer-aided differential thermal analysis	947
Crankshafts strengthened by cold working and austempering	83
Cu-Mo alloyed, CCT diagrams	395
Cu-Mo alloyed, austempering studies	395
Directional solidification study at low and normal gravity	435
Dross formation	881
Effect of RE and Y in Mg treatment alloy on structure	417

Fracture toughness of heat treated permanent mold iron	539
Heat treating crankshafts	83
Heavy section, alloying elements effect on segregation	289
Manganese plus chromium effect on microstructure	387
Ni-Mo alloyed, austempering effects	489
Shrinkage factors	765
Solidification in shell and CO <sub>2</sub> molds	561
Trace element and composition variations vs. annealing time	841
Vs. cast steel in fracture toughness tests	239
Dusts recycled into steel foundry arc furnace	475

## E

Electrical resistivity measurement during cast iron solidification	803
Electrical resistivity vs. thermal analysis in Al-Si microstructure evaluations	123
Electroslag casting of steel valve bodies	55
Employee right-to-know laws	173
Energy; arc furnace power demand control	545
Evaporative pattern casting, production system	629

## F

Feeding phenomena in aluminum alloys	671
Filters, ceramic; gray and ductile iron application	339
Finite element method analysis of microstructure-mechanical property relationships in Al-Si alloys	703
Foundry management issues	977
Fracture mechanics and Charpy impact tests compared	239
Fracture toughness influenced by microstructure of Zn-Al alloys	693
Fracture toughness of heat treated permanent mold ductile iron	539
Fracture toughness testing of steel and ductile iron	239
Furnaces; low-energy reverberatory type for molten aluminum	199

## G

Gravity and directional solidification study of gray and ductile irons	435
Gray iron	
Alloy elements effect on strength and microstructure	923
Ceramic foam filter development	339
Directional solidification study at low and normal gravity	435
Effect of Si, Mn, Cr, Ni, Mo, and Sn on strength and microstructure	923
Kish graphite in hypereutectic gray iron	281
Plasma arc cutting using a robot	729
Polyvinylchloride additions remove excess Mn	505
Green sand	
Computer program for test data analysis	119
Effects and economics of reclaimed sand use	1
Properties at 7-15% bentonite	467

## H

HMP process produces plastic patterns	203
Hardenability control using a computer	965
Hazardous solid wastes recycled in steel foundry	475
Heat pipe used in solidification model	429
Heat transfer model for solidification	429
Heat transfer	
Mechanisms at metal-mold interface	587
Models show convective effects in casting cavity	519

## Heat treatment

Austempering Ni-Mo ductile iron	489
Austempering improves Cu-Mo ductile iron mechanical properties	395
Ductile iron chemistry related to annealing time	841
Ductile iron crankshafts	83
History; cast iron architecture	789

## I

In-the-mold production of ferritic and pearlitic CG iron	361
Induction furnaces; refractory build-up	981
Industrial engineering; metal cutting unit cost and production time formulas	515

## K-L

Kish graphite formation in hypereutectic gray iron	281
Ladle technology	637
Laws protecting employee's right to know	173
Leaded copper alloys-molding sand reactions, lead removal technique	793
Linear programming use in scheduling for flaskless molding	661
Lost foam castings production system	629

## M

Machining and grinding, minimum cost models	515
Management issues	977
Manganese excess in gray iron removed by polyvinylchloride additions	505
Manganese plus chromium effect on ductile iron microstructure	387
Melt chemistry and hardenability control using a computer	965
Mold dilation, volumetric shrinkage, and thermal profile correlations in cast iron	551
Mold filling, heat transfer	519
Mold metal interface; heat transfer mechanisms	587
Mold wall movement; ductile iron	765
Molybdenum addition effect on CG iron properties	735

## O-P

Olivine sands; post-reclamation properties	177
Patternmaking	
Plastic patterns by the HMP process	203
Spray metal patterns	309
Permanent mold aluminum foundry management	499
Permanent mold casting; fracture toughness of heat treated ductile iron	539
Plasma arc cutting	29
Polystyrene patterns used in Replicast FM and CS	271
Polyvinylchloride additions remove excess Mn from gray iron	505
Pouring; simulation of convective heat transfer	519
Production scheduling, computer systems	151

## Q-R

Q-ATSU vacuum gas-cured molding process	37
Rare earth and yttrium added to ductile iron treatment alloy	417
Rare earth treated CG iron, inoculation and fading effect	401
Reclaimed sand use in green sand molding	1
Recycling arc furnace baghouse dust	475
Recycling metals in stainless steelmaking wastes	749

<b>Refractories</b>	
Build-up in induction furnaces	981
Cold disposable ladle lining	637
Replicast FM and CS process	271
Right-to-know laws and the foundry industry	173
Risening; computer-aided calculations for steel castings	73
Robot use in plasma arc cutting of gray iron	729
Robots programmed for mold venting	623

## S

Sample approval based on statistical methods	259
<b>Sand molding</b>	
Computer program for robotic mold venting	623
Dimensional tolerances in high-pressure flaskless mold castings	65
Flaskless molding scheduling using a computer	661
Vacuum gas-cured Q-ATSU process	37
Sand molds; reactions with leaded copper alloys	793
Sand properties at 7-15% clay levels	467
<b>Sand reclamation</b>	
Effect on silica and non-silica sands	177
Planning for thermal reclamation	347
Sand system control using BASIC computer program	119
Scheduling flaskless molding using linear programming	661
Scrap, ferrous; demand, supply and price	785
Segregation related to shrinkage in sand-cast ZA-27	263
Segregation vs. alloying elements in cast iron	289
Shell molded ductile iron, solidification study	561
Shell process; cold shell process and equipment	7
Shrinkage study of zinc-aluminum alloys	861
<b>Shrinkage</b>	
Caused by macrosegregation of sand-cast ZA-27	263
Ductile iron study	765
Volumetric change measurements	551
Silica and non-silica sands, post-reclamation properties	177
Silicon recovery vs. charged aluminum in cupola iron	161
Sodium silicate-CO <sub>2</sub> molded ductile iron, solidification study	561
<b>Solidification</b>	
Computer model for cast iron chill test samples	311
Geometric modeling of thermal, process, and design variables	135
Principles and control	681
Simulation of leaded red brass	479
Structure study using electrical resistivity measurements	803
Study of ductile iron in shell and CO <sub>2</sub> molds	561
<b>Solidification, directional</b>	
Low gravity effects in gray and ductile iron	435
Related to feeding factors in aluminum alloys	671
Solidification model using a heat pipe	429
<b>Solidification sequence curves for aluminum</b>	
T-shaped castings	319
Stahl foundry management	499
Statistical methods for sample approval	259
<b>Steel</b>	
Electroslag castings	55
HSLA production and control	645
Ladle desulfurization of acid melted heats	709

Riser calculations using a microcomputer	73
Stainless steel low-chromium alloys	17
Stainless; furnace dust, swarf and mill scale recycled	749
Valve bodies produced by electroslag casting	55
Vs. ductile iron in fracture toughness tests	239
Strontium dissolution in liquid aluminum and A356	109

## T

Thermal analysis vs. electrical resistivity for Al-Si microstructure evaluations	123
<b>Thermal analysis</b>	
Assisted by computer to test Al alloy structures	907
CE-liquidus temperature relationship in cast iron	871
Computer-aided DTA of ductile and compacted graphite cast irons	947
Use in assessing grain refinement and modification in Al-Si	297
Thermal profiles vs. volumetric shrinkage and mold dilation in cast iron solidification	551
Time and cost models for metal cutting	515
Titanium use in CG treatment alloy	45
Trace elements in ductile iron related to annealing time	841

## V

Vacuum gas-cured molding (Q-ATSU process)	37
Ventilation guidelines for torch cutting and air carbon arc gouging	529
Venting molds by robots, computer program	623
Vibration white finger	227

## W

Waste control by recycling stainless steelmaking wastes	749
Wastes recycled in arc furnace	475
Waste sand characteristics	347
Water jet use to clean castings	655
Wear resistant Al-Si alloy development	209
Wear-structure studies of high Cr-Mo white irons	599
White finger	227
<b>White iron</b>	
Si, Mo, V, and W effect of 20% Cr iron structures	355
Structure and abrasion resistance of high Cr-Mo irons	599

## Y-Z

Yttrium and rare earth added to ductile iron treatment alloy	417
<b>Zinc-aluminum alloys</b>	
Fluidity, segregation and underside shrinkage	861
Influence of as-cast microstructure on fracture toughness	693
Macrosegregation and underside shrinkage	263
